

EHSAN OMER HUSSEIN

Software Engineer · Full-Stack Developer

Erbil, Iraq | +964 751 247 7494 | ehsanumar84@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Software engineer with six years of experience and a B.Sc. in Computer Science, specializing in full-stack web development. Skilled in building responsive, scalable, and maintainable applications across the stack with JavaScript, PHP, Laravel, Node.js, and Python. Experienced in delivering enterprise-grade platforms—from logistics and education systems to secure banking applications—with a focus on clean architecture, performance optimization, and seamless user experience. Committed to continuous learning and applying emerging technologies to solve complex problems.

TECHNICAL SKILLS

Front-End: HTML, CSS, Bootstrap, Tailwind CSS, Sass, JavaScript, Vue.js, Svelte, jQuery, AJAX

Back-End: PHP, Laravel (Livewire, Nova, Filament, Breeze, Jetstream, Passport, Sanctum, Socialite, Telescope, Spatie Media Library & Permissions), C#, Node.js, Python

Databases: MySQL, SQL Server, Eloquent ORM, Firebase / Firestore

Cloud & DevOps: AWS (EC2, S3, Lambda), Cloudflare, Git, server management & configuration, RESTful APIs

Practices: OOP, MVC architecture, testing, optimization & refactoring, Agile methodology

Design & Tools: Figma, Adobe Photoshop, Illustrator & XD, MS Office, MATLAB, network configuration

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Jiasaz Company · ZMC Express

Jan 2024 – Present

Erbil · On-site, Full-time

- Develop and maintain the ZMC logistics and express-delivery platform (zmcexpress.iq), an enterprise-level system serving businesses and individuals across Iraq.
- Build responsive interfaces with HTML, CSS, Bootstrap, and DataTables, and implement scalable back-ends using PHP, JavaScript, jQuery, and AJAX within MVC frameworks.
- Optimize performance through efficient server-side scripts, OOP-based modular code, and streamlined database queries.
- Collaborate with cross-functional teams to deliver secure, user-friendly solutions and ensure high system reliability.

Full-Stack Developer — Jiasaz Company · RT Bank E-Statement

Jan 2024 – Present

Erbil · On-site, Full-time

- Designed and developed a secure e-statement platform for RT Bank, enabling customers to view and download official bank statements online.
- Implemented role-based access control and encrypted data handling to ensure full compliance with banking security standards.
- Applied performance optimizations while keeping the interface clean and user-friendly.

Freelance Full-Stack Developer — Remote

2025 – Present

- **La Castello Restaurant & Delivery System (Denmark)** — co-designed and built a complete online ordering and delivery platform (lacastello.dk) for the European Kurdish market, focused on usability, performance, and seamless ordering workflows. Developed the companion customer and driver mobile apps in Flutter.

Freelance Full-Stack Developer — Remote

Apr 2025 – Sep 2025

- **Learning Point Education Management System** — maintained and enhanced an institutional platform (learning-point.krd) for managing students, teachers, classes, and exams, adding performance tracking, exam preparation, and parent-feedback features while improving stability and usability.

Member, Computer Science Advisory Board — Soran University

- Contribute to curriculum development and strategic decisions for the Computer Science academic program.

Accountant & Systems Administrator — Oil Land Company

Erbil

- Managed financial records, performed accounting tasks, and prepared detailed financial analysis and reports.
- Ensured compliance with financial regulations and standards, and maintained company systems for efficient operations.

KEY PROJECTS

- **ZMC Express** — logistics and express-delivery web platform serving businesses and individuals across Iraq with fast, secure parcel and shipment tracking.
- **ZMC Staff App** — internal mobile app enabling staff to manage shipments, update delivery status, and coordinate daily logistics operations.
- **ZMC Customer App** — customer-facing mobile app for placing orders, tracking shipments in real time, and managing deliveries.
- **E-Statement System (RT Bank)** — secure platform enabling bank customers to view and download official statements online; implemented role-based access control, encrypted data handling, and performance optimizations to meet banking security standards while keeping the interface clean and user-friendly.
- **La Castello (lcastello.dk)** — online ordering and delivery platform for a Danish restaurant serving the European Kurdish market.
- **La Castello Driver App** — Flutter mobile app for delivery drivers to receive, manage, and complete delivery assignments.

EDUCATION

B.Sc. in Computer Science — Soran University

2024

Self-Directed Software Engineering Study

2020 – Present

- Continuously expanding software-engineering skills through online courses and personal projects.

CERTIFICATIONS

- AWS EC2 — provisioning, managing, and optimizing scalable virtual servers.
- AWS S3 — secure, scalable object storage for backup, archiving, and content delivery.
- AWS Lambda — building event-driven serverless applications.
- Software Engineering — principles of designing, developing, and maintaining reliable systems.
- English Language Proficiency — Soran University.

LANGUAGES

Kurdish: Native — Kurmanji & Sorani

English: Intermediate (B1–B2) — British & American

Persian: Beginner

Arabic: Basic — Modern Standard & Gulf
